

What a \$29/mo Apify Starter plan buys the lead-gen agent

HEADLINE NUMBERS

LEADS W/ EMAIL · MONTH

~19,300

\$29 credit ÷ \$1.50/1k actor

COMPANIES · MONTH

~6,400

at 3 contacts/company

COST / LEAD SOURCED

\$0.0015

Apify actor cost only

AI ENRICH COST / LEAD

\$0.00006

Groq llama-3.1-8b-instant

WORKED EXAMPLE

ONE MONTH, STARTER PLAN, LEADS-FINDER ACTOR

\$29 credit ÷ **\$1.50** per 1,000 leads

= **19,333 leads** sourced, verified email included

× **\$0.00006** AI enrichment cost/lead

= **~\$1.16** total AI cost for the month

Total spend: **\$29 + \$1.16 ≈ \$30.16/mo** for **~19,300 ready-to-contact leads**

PIPELINE IN SHORT

Source (Apify) → **validate** (regex, \$0) → **AI-qualify** (Groq, ~150/hr) → **enroll** in campaign → **send** (max 1 email/lead/day).

Apify's 19,300/mo ceiling is the actual bottleneck — internal qualification throughput (~3,600/day) clears it easily.

COST BY SCENARIO

SCENARIO	LEADS/MO	APIFY	+ HUNTER.IO VERIFY	+ AI ENRICH	+ SDR AGENT	TOTAL/MO
Sourcing only	19,333	\$29	—	\$1.16	—	~\$30.16
Sourcing + verification	19,333	\$29	~\$104	\$1.16	—	~\$134.16
Full stack (incl. SDR agent plan)	19,333	\$29	~\$104	\$1.16	\$100	~\$234.16

Recommendation: start with the \$29 Starter plan alone — the leads-finder actor's built-in email verification covers the basic case, and AI cost is negligible (<4% of plan cost). Add Hunter.io only if bounce rates prove too high. The \$100/mo AI SDR Agent subscription is the platform's own access fee, separate from Apify/Hunter.io/AI usage costs.
